

We have been using Frank Capparelli Landscaping since moving into our newly-built home in 2001.

Our first project was working with Gus to create beautiful, but simple-to-maintain foundation plantings around the house. Gus was able to provide excellent plant suggestions that complement the house and a design that softens and blends it seamlessly into its surroundings. He was able to listen to our preferences and ideas, provide feedback and plant information, and then translate everything into designs that receive tons of compliments each year.

Since our initial project, and as our budget allowed, we have worked with Gus to design and install additional plantings: entrance plantings that flag the driveway, landscape lighting, a tree allee, a vegetable garden, screening landscaping, a paved driveway and parking area, fruit trees, and backyard transitional plantings with stone steps. Gus has always been patient, knowledgeable and full of good ideas. When I can't exactly describe what I am looking for, he has taken the time to meet me at the nursery to "look around" and I always end up finding the perfect tree or plant. He really cares that the designs turn out as planned and that you are happy with everything at the end of the day.

In addition, the guys that work for Gus are fantastic! They are reliable, professional, and extremely hard-working. They are always concerned about doing the job right, and not just getting it done, which is refreshing these days.

We also use Frank Capparelli Landscaping for our yard maintenance and have been nothing but pleased with the results. Questions or problems are always addressed in a timely manner--Gus is great on returning calls and following up on things and showing up for appointments on time!

My husband and I would highly recommend Frank Capparelli Landscaping to anyone looking for personal attention, great service, and great landscaping.

Sincerely,

Christie Noelle and Scott Krase
