

Gus,

I am writing to let you know how very pleased we are here at Tompkins Gardens with the work you have done to the property. We all recall how dreary the property looked before you came. It was wonderful to see how a professional operates. You first asked us some very important questions including what we wanted to see and very importantly how much we wanted to spend. You didn't come across like many other landscapers had with an attitude that a lot of money was required to make the grounds look beautiful.

Once we made our decision to hire F. Capparelli Landscaping you put together a professionally orchestrated blue print design which outlined each tree, shrub and flower along with their location on the property. You laid out a plan for maintenance which we have been utilizing for over five years.

Your crews have always behaved in a professional and courteous manor. When you and your crew leave us the only sign of your being here is the beauty left behind.

F. Capparelli Landscaping is a partner in keeping our grounds as attractive as possible and we would recommend them to anyone.

Sincerely,

Ron Worby
